File Details:

Walking List: the walking list is a PDF (uneditable) file generated by precinct and sorted by street address. Under each street address is listed all the voters who live in that address and their political party. It is designed for walking up and down the streets, with even addresses in the left column and odd on the right. **It is not available Statewide; however, the data is in the Registered Voter List.**

Mail-In Applicants List: Text file containing a list of voters with mail-in ballot **requests** for the given election. It includes voter id, name, residential address, mailing address, absentee ballot address, precinct, district information, state and county registration dates, party, mail-in type, mail-in request status, and county. Actual mail-in VOTERS are on voter history lists.

Permanent Mail-In Applicant List: Text file containing a list of voters with mail-in ballot requests for any future election. It includes voter id, name, residential address, mailing address, absentee ballot address, precinct, district information, state and county registration dates, party, mail-in type, mail-in request status, and county. Not every voter on this list will qualify for every election. Actual mail-in VOTERS are on voter history lists.

Early Voting List: Text file listing voters who voted at an early voting location for a given election. It includes voter ID, name, early voting location, date of voting, party, residential address (in one column), mailing address (in one column), ballot style, precinct, and gender. This information is already on the voter history lists.

Registered Voters List: Text file containing a list of registered voters with name, party, gender, residential address, mailing address, status (active or inactive), state and county registration dates, split and precinct, congressional district, legislative district, councilmanic district, ward, municipal district, commissioner district and county.

Voting History Included in Registered Voter List: Text file identical to the registered voter list **EXCEPT:** some columns are in a different order, it does not have a column for county or commissioner district, and there is a column for each election selected. This list is easy to view when opened in a spreadsheet format, but it gives no data on voting method or date. **Statewide lists are limited to 5 elections.**

Voting History as Separate File from Registered Voter List: The Voting History file contains the following columns: Voter Id, Election Date, Election Description, Election Type, Party, Election Code, Voting Method, Date of Voting, Precinct, Early Voting Location, Jurisdiction Code, County Name. To match each record in this file to a registered voter, use the Voter ID column in the Registered Voter List. This file is for technically savvy individuals.

Provisional List: Text file listing voters who were issued a provisional ballot. It includes voter ID, name, residential address, mailing address, precinct, legislative district, congressional district, councilmanic district, commissioner district, school zone, state and county registration dates, party, voted date, provisional status, provisional status reason, county voted in, polling place precinct, ballot issue reason, ballot style required, and ballot style voted.
